SUMMARY

Driven Computer Science undergraduate with hands-on experience in full-stack development, cloud computing, and AI/ML through internships and real-world projects. Strong problem-solving skills, backed by 200+ coding problems solved, with a passion for designing scalable applications and learning modern technologies. A quick learner and collaborative team player committed to delivering high-quality software and contributing to innovative, customer-focused products in a fast-paced engineering environment.

EDUCATION

Bachelor of Technology in Computer Science Engineering (AI & ML) **Aug 2023- Present**
Anil Neerukonda Institute of Technology and Sciences, Visakhapatnam

- CGPA: 7.9
- Expected Graduation: 2027

SKILLS

- Languages: Java, Python, JavaScript, Go, SQL
- Frontend Development: React.js, Next.js, HTML, CSS
- Web: Node.js, Express.js, REST APIs, Spring Boot
- Databases: MongoDB, MySQL
- Machine Learning & NLP: Scikit-learn, PyTorch, Supervised Learning, Natural Language Processing (TF-IDF, Tokenization), Model Evaluation
- Cloud & DevOps: AWS (EC2, S3, IAM), Docker, Jenkins, GitHub Actions, Terraform
- Tools: Git, GitHub, Postman, Google Colab

WORK EXPERIENCE

AI Azure Intern – Edunet Foundation (Microsoft Initiative) **May 2025 - Jul 2025**

- Developed and deployed AI workflows using Azure services for cloud-based ML pipelines
- Integrated multiple Azure services enabling end-to-end application deployment
- Built proof-of-concept solutions using Azure AI APIs and tools
- Applied cloud security practices including identity and access management (IAM)

Google Student Ambassador **Aug 2025 - Dec 2025**

- Organized workshops/events on topics like AI, ML, and Web Development
- Guided students in learning technical skills and participating in hackathons
- Collaborated with teams to increase student engagement and community growth

PROJECTS

AI Study Assistant (Full-Stack Web Application)

- Developed a web application that allows users to upload study materials and ask questions about the content.
- Implemented a backend service that extracts text from PDF documents and prepares the data for semantic search.
- Integrated language models to generate answers based on retrieved document context.
- Stored document metadata and user queries using MongoDB.
- Deployed the application using Streamlit Cloud and managed the source code with GitHub.
- [GITHUB](#)

DEVTEAM | Multi-Agent AI Software Development Platform

- Developed a multi-agent AI platform that automates software development workflows through specialized AI agents.
- Implemented agent-based project planning, code generation, testing, and documentation features.
- Built a responsive dashboard for task management, team collaboration, and project tracking.
- Integrated AI-driven workflow orchestration to improve development efficiency and productivity.
- Tech Stack: React.js, TypeScript, Node.js, AI Agents, REST APIs, Railway, GitHub
- [Live](#)
- [Github](#)

Resume Analyzer (NLP-Based Web Application)

- Designed an NLP-based system to analyze and score resumes
- Implemented keyword extraction and similarity matching using Scikit-learn
- Implemented TF-IDF vectorization, tokenization, and cosine similarity matrices using Scikit-learn to evaluate semantic text overlap.
- Improved preprocessing efficiency through optimized data handling
- Achieved fast response time with accurate predictions
- Developed keyword extraction and semantic similarity matching algorithms—utilizing the exact foundational NLP architectures that modern AI search engines (like Perplexity and Gemini) use to crawl, index, and cite source material for Answer Engine Optimization (AEO).
- [LIVE](#)

Interview Ace AI | AI-Powered Mock Interview Platform

- Developed an AI-driven mock interview application that generates role-specific technical and HR interview questions.
- Implemented real-time AI-based response evaluation with personalized feedback and improvement recommendations.
- Integrated user authentication, interview history tracking, and performance analytics using Firebase.
- Built a responsive web application using React.js, JavaScript, HTML, CSS, and AI APIs to enhance interview preparation and confidence.
- Tech Stack: React.js, Firebase, JavaScript, HTML, CSS, Gemini/OpenAI API. [GITHUB](#)

AWS CI/CD Deployment for MERN Application

- Developed and deployed a full-stack MERN application on AWS EC2 Enabled automated CI/CD pipelines using Jenkins and GitHub Actions Configured secure cloud infrastructure with IAM roles and security groups Reduced deployment time by 40% and improved delivery consistency
- Supported 100+ users in testing environment.
- [GITHUB](#)

VerifyX – AI-Powered Digital Trust & Public Safety Platform

- Developed an AI-powered platform to verify websites, news, images, and social profiles using React, TypeScript, Express.js, and Gemini AI.
- Implemented secure JWT-based authentication, user management, and RESTful APIs with encrypted password storage using bcrypt.
- Built AI-driven trust scoring, risk analysis, and verification reports through an interactive dashboard for detecting misinformation and fraudulent content.
- [GITHUB](#)

CERTIFICATIONS

- Microsoft Full-Stack Developer - Coursera(2026)

Machine Learning & Generative AI

- Google Cloud Gen AI Academy – Building & Deploying GenAI Solutions (2026)
- IBM SkillsBuild – Artificial Intelligence Professional Certificate (6-Week Intensive, 2026)
- Microsoft Initiative (Edunet Foundation) – Azure AI & Cloud Workflows Certification (2025)
- Google Ads AI-Powered Performance Certification — Google Skillshop (2026)

Problem Solving & Engineering Foundations

- HackerRank – Problem Solving & Python (Certified)
- HackerRank Skill Certification – Software Engineer Intern (Verified)
- NPTEL – Advanced Technical Course & AI/ML Proctored Certifications (IIT Initiatives)

Cloud, DevOps & Data Analytics

- DevOps on AWS Specialization – Udemy (2026)
- AWS Cloud Technical Essentials – Coursera (2026)
- Microsoft Power BI Data Analyst (Certified) – Coursera

LEADERSHIP & RESPONSIBILITY

- Organized and led an 8-hour inter-college “Vibe Coding Hackathon” with 80+ participating teams across multiple institutions.
- Coordinated technical and non-technical college-level events, managing logistics, team communication, and execution.
- Active NSS member contributing to campus and community initiatives.

ACHIEVEMENTS:

- Solved 200+ problems on LeetCode and HackerRank
- Engineered an automated data-scraping and NLP analytics pipeline that evaluated digital market positioning, optimizing keyword strategies to increase semantic search relevancy
- Earned HackerRank certifications in Problem Solving and Python
- Qualified Hacker Rank Software Engineer Intern
- Developed an NLP pipeline optimizing keyword semantic search relevancy
